BPA Energy Efficiency

- Energy Smart Industrial (ESI) is a regional program that partners with NW public utilities to assist industrial customers with electrical energy efficiency projects
 - Provides technical support at no cost to industrial customers to identify and analyze energy efficiency projects

BPA Energy Efficiency

- Typical Compressed Air Projects coming through the program
 - VSD Compressors – “major majority” of projects
 - Refrigerated Cycling Dryers
 - Compressor Controls
 - Track and Tune – operations and maintenance
 - Leak Reduction
 - Compressor and Dryer Controls
 - Demand Reduction

BPA Energy Efficiency

- Working with the ESI program
 - Work through your electrical utility
 - Don't order equipment before obtaining utility acceptance
 - Measurement and Verification (M&V) will be required
